

SCIENCE OF BEING is a rare combination of deep knowledge of Universal Forces and laws and of Inspiration, through which the Fundamentals of All Beings were perceived by the author. It is a complete science, a unique work, which, from beginning to end, shows perfect logic and unity, unfolding gradually before the reader all the so-called Mysteries of Human Existence which have been presented before at various periods of Humanity's Evolution in a veiled form, in allegories, discernible only by those who could fathom their inner meaning.

SCIENCE OF BEING takes away that veil of mystery from everything it touches and presents to the world a simple, clear, and at the same time complete interpretation of the invisible Universal Forces and Powers and their visible operation in Nature and in the lives of human beings. It explains the Fundamentals of all Existence. It unveils the origin of Man and adjusts his relation to his fellow beings and to the World in which he lives. It elucidates the different Laws which underlie and govern all Creation. It unearths the limitless treasures of qualities and powers which Man possesses at his very birth, and furthermore it sets forth simple and direct methods for putting into practical daily application those wonderful Forces and Laws.

CAMP ALFRED VAIL, N.J. – I feel that you have made an invaluable contribution to the knowledge and power of the world, and that your book will take its place as one of the most significant works of this generation. In addition to its epoch-making contents, the book is a masterpiece of the publisher's art. I do not see how its form or appearance could be improved upon. – Mr. G.B.L.

These ancient lessons are some of the most profound teachings on earth in written form. These Heavenly Endowments are Humankind's birthright; they belong to you innately; you merit them working perfectly and optimally in all areas and levels of your life. - Laura Taylor-Jensen, AHLB
