Of Nature's inexhaustible Forces and Powers, one Power is the most important of all, as It is the Foundation of Life Itself, and that is "THE ENERGY OF THE UNIVERSE," which, in a certain aspect, is known today to Scientists under the name of the Magnetic Current of Nature. This Power, contacted, by a special method, discovered by Eugene Fersen, originator of "The Science of Being" and founder and leader of THE LIGHTBEARERS, is used in the Public Healing Assemblies which every Sunday Eugene Fersen is holding in Portland for the benefit of all who are afflicted with ailments, physical, mental and emotional.
